Please write a short summary of your Capstone project and its components. Describe the problem statement, your approaches and your conclusions. (200-400 words)

A flashcard or flash card (also known as an index card) is a card bearing information on both sides, which is intended to be used as an aid in memorization,

This project is made by using the React app-&- tailwind css

This Project is consist the three(3)-pages

1) Creating the Flash card:-

In this page to creating the Flash Card with
- creating the group with image to easy to understanding
- add some description about the group
- To enter the term and nature of the work and add the some description

by adding the above mentioned data we are creating a number of Flash cards.

2) MY FLASH CARD:-

This page is used to sell our flash cards.which is created .

3)Home and Shearing the flash cards:

this page to returning the homepage of the project and shearing the flash card in social media like facebook, whatsapp -&- instagram etc

For better appearance we adding some photos

the whole project is made by using the React.js and tailwind.css
